Innovative Investment

We have an extensive range of 'in-house' manufacturing processes with a commitment to invest in new technology. Recent investments include:

A Haas Automation, Inc. VF 2SS Super-Speed vertical 4 Axis machining centre that features: cutting speeds of up to 12,000-rpm; inline direct-drive spindle; an ultra-fast side-mount tool changer; and high-speed rapids on all axes. This investment has given us further machining capabilities and broadens our range of services.

A Servo driven 4 HEAD CNC Stud welder with a 2000x1050mm weld area capacity.

Accuracy of the machine is + / - 0.15mm over the distance from the datum point per stud.

The bowl feeder units can automatically supply threaded, unthreaded, or internally threaded studs (M3 to M8 diameter and 6mm-35mm length as standard).

For more information on the services we provide call us on 01937 586987 or visit our website www.gsmvaltech.co.uk

Static Elimination Technology

Ioniser-Pro is a brand name of GSM Valtech Industries Ltd.

After 40 years of being a sub-contractor, manufacturing parts for our customers, we decided to develop and invest in our own product range. They are designed by our own in-house engineers and manufactured in our West Yorkshire factory.

The Ioniser-Pro range can be used in any Industry where static charge is produced.

Benefits of the Elimination of Static in Industry

- Improved productivity
- Machine operators protected from static shock
- Product quality improved
- Less errors so less rejects meaning less waste
- Contamination prevented
- Increased efficiency
- Fewer malfunctions
- Machines operated at higher speed
- Less time used on equipment checking and cali-

GSM VALTECH

All Under One Roof

All of our services are supplied from our centre of excellence in Wetherby, Yorkshire. Our one stop solution can minimize your supplier base, reducing your management time and shipping costs.

We provide a full sub-contract and component sourcing service. Send us your 'Bill of materials' for a complete solution package. With the knowledge that our quality and management systems are ISO9001 registered, you can be sure that we will design, manufacture, assemble, test and package your products to the highest standard.
